Zoom Challenge 3

Your next zoom challenge is to make ‘something’ using things you have in your house (are there any old boxes you could cut up in your recycling?). You can make anything you like e.g. a cake, bird feeder, rocket, rainbow or even a sword, let your imagination run wild!!!!!

You then need to write or record instructions which somebody else could follow.

How to make a Birdfeeder

**Equipment**
- 1 toilet roll
- 1 piece of string
- Peanut butter
- Seeds
- Scissors

**Method (what you need to do)**
- First make sure you have all the equipment you need.
- Then you need to cut 1 piece of string about 90cm long.
- After that coat your toilet roll in a thin layer of peanut butter (or anything you have that is sticky, I used honey)
- Next pour out a handful of seeds onto a plate and roll the toilet roll along the seeds making sure they stick
- Then feed your piece of string through the toilet roll and tie a knot at the top.
- Leave your bird feeder to dry for around half an hour.
- Finally take your bird feeder outside and hang it on a strong branch.

Remember instructions must always include:
- A title
- Subheadings
- A list of ‘things you will need’
- Step by step instructions
- Ordering language (first, next, then)
- Bullet points
- A picture

I typed up my instructions on my computer but you could write your instructions and draw a picture to go with it.
