1. Can you carry on the pattern? What would the next 3 calculations be?

\[
\begin{align*}
\frac{10}{10} - \frac{9}{10} &= \frac{1}{10} \\
\frac{9}{10} - \frac{8}{10} &= \frac{1}{10} \\
\frac{8}{10} - \frac{7}{10} &= \frac{1}{10}
\end{align*}
\]

2. The answer is \( \frac{1}{5} \)

What is the question? Can you write down three possible subtraction questions?

2. Fill in the missing numbers to make the calculations equal.

\[
\begin{align*}
\frac{9}{10} - \frac{10}{10} &= \frac{5 + 1}{10} \\
\frac{5}{5} - \frac{5}{5} &= \frac{1 + 1}{5}
\end{align*}
\]

5. Is this correct? Can you explain why in your own words?

\[
\begin{align*}
\frac{8}{10} - \frac{4}{5} &= 0
\end{align*}
\]

6. The answer is \( \frac{1}{2} \)

What is the question? Can you write down three possible subtraction questions?
