October 2019

Dear Parents/Carers

The school health questionnaire that parents are asked to complete for each child in Reception is changing. From autumn 2018 we have replaced the paper questionnaires with an electronic version. This will be accessed via the link below.

https://surveys.clch.nhs.uk/SHQ-Reception-Richmond

Research has shown that parents would like to receive information electronically. In recognition of the fact that this is a new process and not everyone may have access to the internet to complete the questionnaire, there will be a few printed copies which parents can request.

In following the Healthy Child Programme recommendations from the Department of Health, we aim to offer a series of screening programmes including individual health reviews along with health promoting activities.

All health-related information is kept confidential but in some instances (medical conditions that require management in school, i.e. asthma) this may be shared on a need-to-know basis with some other services including the school, to be able to better support your child in school.

Please try and complete this Health Questionnaire within the next two weeks.

If you do not wish your child to be seen by the School Health Service please e-mail us on the link below.

Thank you for your support.

Yours sincerely

School Nursing Team Richmond
