Dear Parents and Carers,

**Year Four Science Lesson at Buckingham Park**

This term, in Science, we have been learning about ‘Animals, including Humans’. As part of this topic, we have learnt about the seven life processes, how to classify living things based on their characteristics, and examined the differences between vertebrates and invertebrates.

In order to extend and apply the children’s learning, we would like to go on a ‘Mini-beast hunt’ around Buckingham Park, next week. Within this lesson, we hope to find a range of mini-beasts and invertebrates and use a key to identify different species. We believe that this practical and interactive lesson will provide a brilliant opportunity for a review of our learning, whilst also being great fun!

The sessions will last about an hour and will take place on **Tuesday 15th October for Mulberry Class, Thursday 17th October for Rowan Class and Friday 18th October for Laurel Class.**

As this Science lesson will take place outside of school grounds, we require your permission, in order for your child to participate. Please log onto your SCOpay account and tick the permission box in order for your child to take part by **Monday 14th October.**

With many thanks,

**The Year 4 Team**

Miss J Elsen  
Laurel Class

Mrs S Seward  
Mulberry Class

Miss T Mehrotra  
Rowan Class
