- To know the value of different coins
- To add two one digit numbers
- To compare weight using 'heavier/est lighter/est
- To discuss standard units of measurement
- To say what writing will be about
- To use imperative verbs
- To sequence instructional writing
Coins

Can you say the name of each coin?
How can we sort the coins?
Which coins will you need for each item?

- Ice cream: 9p
- Toy: 16p
- Laptop: £1.20
- Flower: 67p

measuring

Digital scales – The number on the screen tells us how heavy the thing we are weighing is.

Analogue scales – The dial points to a number which tells us how heavy the thing we are weighing is.
Normally, when we bake we use scales to help us weigh ingredients.

Can you weigh some things in your home?
Cooking time!
Writing instructions

• What did we make?
• How did we do it?
Instructions

• We are going to write some instructions to help someone else make what we made.

• For our instructions to work, we need to use bossy verbs.
Bossy verbs

• Bossy verbs are verbs that tell us what to do.
• They are very important in instructions because they help us know what we need to do next.
Sequencing words behind blue boxes
Additional activities

• Review your product – did it work? Why/why not?
• Create an advert for your product
• Write a letter to someone persuading them to make what you made too (was it delicious? Could they do a better job?)

• Set up a shop and create the adverts for what you will sell
