Tuesday 5th September 2017

Dear parents/carers,

As a school, we have subscribed to an engaging mathematical and spelling program called Sumdog. Some pupils will be familiar with the website if they have participated in the regional or national competitions. Subscription to the website has enabled us to have access to a wider number of games, assessments and tailored learning. Sumdog uses games to encourage children to develop their skills and adapts the games to your child’s needs.

To help your child with their spelling and mathematical learning, we’d like to encourage your child to play Sumdog regularly each week. As your child plays, Sumdog will ask questions relevant to their individual learning.

Your child will receive a personalised login card from their class teacher. Sumdog can be accessed via the website on a computer, or download the 2D and 3D Sumdog iPad or Android apps.

Parents can also have a free Sumdog login. Just visit www.sumdog.com and click on the parents’ link on the bottom right side. This lets you keep in touch with your child’s effort.

If you have any questions, please come and see me. We hope your child enjoys playing Sumdog!

Regards,

Ms Holden
Deputy Headteacher
