Year 5 Relationships and Sex Education 2018

Dear Parents,

As part of their Science and PSHCE curriculum, Year 5 will be watching parts of a DVD called ‘Living and Growing’ by Channel 4 and will be learning the following aspects of Relationships and Sex Education:

*They will learn about the physical changes that occur in puberty
*They will understand that puberty brings about changes in emotions
*They will know how changes at puberty affect the body in relation to hygiene
*They will know that the body changes of puberty are preparation for sexual maturity

The children will have the opportunity to ask questions anonymously in relation to the areas we will be covering. If you wish to preview the DVD before your child sees it, please let me know before Wednesday 4th July 2018.

If you have any further questions please let me know.

Thank you,

Miss Newns
