Dear Parents,

As part of their Science and PHSCE curriculum, Sex and Relationship Education will be taught in Year 6 during the week commencing 9th July. The children will watch a series from channel 4 which aims to give them a greater understanding of changes that will occur during puberty and to show an awareness of how media messages can influence the choice that they make. In addition to this we shall also touch on how babies are formed and the different stages that they go through. During the sessions will be able to ask appropriate questions anonymously by posting them in a class “Question Box”.

The children will watch the DVDs as split gener groups group and then will have an opportunity to discuss puberty further with an appropriate adult.

If you have any desire to see the DVD or wish to talk to myself prior to the lesson then please contact me through our website class page or through the school office.

Kind Regards,

Mark Cook
Assistant Headteacher
