a) I need to catch a bus from Wallasey Central Library to arrive at Upton Village by 11:30am. Which number bus should I catch and at what time?

b) How many minutes does the 10A’s journey from New Brighton to Noctorum take?
4) I buy 22 items which cost £7.05 each.
   a) What is the total cost?

   ...........................................................................................................

   b) If you worked out the answer to part (a) on a calculator, what would the display show?

   ...........................................................................................................

5) I live 3.2 km from St Anselm’s College.
   a) How far is this in metres?

   ...........................................................................................................

   b) One kilometre is five eighths of a mile. How many miles do I live from St Anselm’s?

   ...........................................................................................................

   ...........................................................................................................

6) I start watching a film at 6:55pm and turn the television off at 9:35pm.
   a) For how long was I watching television?

   ...........................................................................................................

   ...........................................................................................................
b) In total, a fifth of the time I spent watching television advertisements were being shown. What was the total time of all the advertisements?

…………………………………………………………………………………………

…………………………………………………………………………………………

…………………………………………………………………………………………

7) Solve the following:

a) I think of a number, divide it by 7 and subtract 3. The result is 6. What was the number I first thought of?

…………………………………………………………………………………………

b) There is a number, \(x\). When I add 7 to \(x\) then multiply the answer by 8, the overall result is the same as just multiplying \(x\) by 22. What is \(x\)?

…………………………………………………………………………………………

8) Write the next two numbers for each of the following sequences.

a) 3 10 17 24 31 ... ...

b) 1 3 9 27 81 ... ...

c) 3 4 6 10 18 ... ...

d) 1 1 2 3 5 8 ... ...
9) Complete the spaces shown by dotted lines below.

a) START

   ....

   Subtract 28

   ....

   Add 19

   END

   63

b) START

   17

   Add...........

   32

   Subtract 39

   END

   ...........

10) Write the name of the following shapes underneath them.

   a) ........................

   b) ............................

11) Complete the diagram to show the 8 points of the compass.
Imagine you are facing North East. If you turn through 135° clockwise, which way are you facing?

........................................................................................................................................

12) Look at the chart below which shows the number of vehicles of different types in the car park of St Anselm’s this morning.

![Bar chart showing vehicle types]

a) How many Vauxhalls were in the car park?

........................................................................................................................................

b) How many vehicles were in the car park altogether?

........................................................................................................................................

c) Which type of vehicle is the mode?

........................................................................................................................................
13) Tickets for the zoo cost £9.30 for adults and £6.40 for children.

a) How much would it cost for 6 adults to go to the zoo?

................................................... ..........................................

................................................... ..........................................

................................................... ..........................................

b) How much would it cost for 3 adults and 4 children?

................................................... ..........................................

................................................... ..........................................

................................................... ..........................................

c) What is the maximum number of people that can go to the zoo for £30?

................................................... ..........................................

................................................... ..........................................
14) Look at the grids below.

a) Which grid is more than 50% shaded, left or right?

b) What percentage of the large grid on the left is shaded?

c) What fraction of the small grid on the right is shaded? Give your answer in its simplest form.

15) In a tin of Roses, 8% are “Purple Ones” (hazelnut & caramel). If the tin has a total of 250 chocolates, how many are not Purple Ones?
16) Round each of the following numbers to the accuracy given in brackets.

a) 29.8536  (nearest whole number)

…………………..

b) 170490    (nearest thousand)

…………………..

c) 45.1925487  (nearest tenth)

…………………..

17) Write the following numbers in order of size, starting with the smallest.

0.56  0.5  0.051  0.507  0.308

…………………..

18) If two fair dice are rolled and the two scores added, which of the following outcomes is most likely? Circle your answer.

a) A score of 7

b) A score of more than 10

c) A score that is an even number.

d) A score of 1.
19) I have a bag containing red, blue and white counters. A counter is chosen at random from the bag. There are 32 white counters in the bag and the probability of choosing a white counter is \( \frac{1}{4} \). The bag contains 14 red counters. How many blue counters are there in the bag?

………………………………………………………………

………………………………………………………………

20) Which of the following distances is the most likely height of a man? Circle your answer.
   a) 120 cm
   b) 150 mm
   c) 1.8 m
   d) 112 inches

21) A calculator normally costs £3.80. It is offered in a sale at 25% off. What is the sale price?

………………………………………………………………………………

………………………………………………………………………………

22) Look at the list of numbers below.
   6  12  15  49  52  53  169
   a) Which of the numbers have an odd number of factors?

………………………………………………………………………………
b) Give another example of a number with an odd number of factors.

..................................................................................................................

c) These numbers have a special name. What is it?

..................................................................................................................

d) Which of the numbers is a prime number?

..................................................................................................................

23) Number A = 7 × Number B and Number B = 3 × Number C

a) What fraction of Number A is Number B?

..................................................................................................................

b) How many times bigger than Number C is Number A?

..................................................................................................................

c) What fraction of Number B is Number C?

..................................................................................................................

d) Give three possible values of the numbers.

A = B = C =
24) In November 2006 Becky is two and a half times Anna’s age and Mary is twice Anna’s age.

In November 2009 Anna is half of Becky’s age. Mary is six years older than Anna.

How old are the three girls in November 2009?
