Dear Parents/Guardians,

The School Council are planning to raise money and awareness of the condition Nystagmus.

What is nystagmus?
Nystagmus is a complex condition where the eyes move involuntarily. This makes it harder to see. Few people with nystagmus drive and most face difficulties in everyday life.

Who gets nystagmus?
Every year hundreds of children are born with nystagmus, often with no known family history. Adults can develop nystagmus too, due to accidents or illnesses like stroke or MS.

What does the Nystagmus Network (NN) do?
NN funds research into nystagmus, provides information and support, raises awareness and educates people about the daily impact of nystagmus.

As we have a pupil with Nystagmus, the School Council feel we should support this fundraising event.
Everyone will have a wobbly end to ‘Wobbly Wednesday’ by having jelly and ice cream.
We are asking for a £1 donation to help us with our fundraising.

Thank you for your support
