Hello Year 4 (to be),

I am really excited to start a year full of adventure with you after the summer. I obviously would like you all to rest and have fun with your family but I also have a few fun activities to keep your brains in action.

**Reading activity:**

Summer reading ‘bingo board’. Do as many of these as you can, there may be a prize for the person who reads the most and provides exciting evidence!

**Maths activity:**

Collect information from your family on a chosen topic, for example:

- How many ice lollies did you all eat?
- How many times did you play in the garden?
- How many different day trips did you go on?
- How many times did you eat fruit?

Using this information you have collected can you present it to me mathematically. You could present your findings as a tally chart, a bar chart, a pie chart or another way. I then would like you to tell me something you notice about your chart, for example:

- Who ate the most lollies?
- Which days did you play in the garden the most?

**Creative activity:**

Make something that represents you and what you like to do in your spare time. It can be as wild and creative as you would like as long as it allows me to get to know you better.

Have an incredible summer making memories and I look forward to seeing you all in the new academic year!

Miss.Eassom 😊
