Thursday 21st January 2016

Dear Parents,

This morning we had an unfortunate situation arising with one of the fire sensors in school being activated. The Fire and Rescue service were immediately contacted and the children/adults were speedily and safely evacuated from the school building. It took a short while for the Fire Officers to thoroughly check the school and to give us the all clear to get the children back into the warmth of the classrooms. You’ll be pleased to know there wasn’t a fire, but a sensor being activated by steam in the kitchen area. We have resolved this situation immediately so that this does not happen again.

The children were brilliant and we were very proud with the way they dealt with this emergency situation, particularly on a very cold morning!!

Yours Faithfully,

Mr Tuckwell
