31st January 2017

Dear Parents,

Fire Engine Challenge

This half term Year 2 children will be participating in a Design and Technology workshop linked to their work on The Great Fire of London. The aim of the workshop is to design and make a fire engine with a moving part which would help King Charles II to prevent a future fire.

We would like to invite you along to assist your child in this task. At school we are keen to promote male role models so dads, granddads, uncles etc are especially welcome.

The activity will last approximately 90 minutes and will take place at the following times:-

Class 2LG - Monday 13th February at 9:15 – 10:45am.
Class 2UM - Monday 13th February at 1:30 – 3:00pm.
Class 2NN - Wednesday 15th February at 10:00 – 11:30am.
Class 2TW - Wednesday 15th February at 1:30 – 3:00pm.

Your child will need a cardboard box; a shoe box would be ideal.
Other materials and equipment will be provided by school. However, if your child wishes to bring along other junk materials, e.g. plastic pots/bottles, card rolls, paper/card, string/ribbon, etc, to use and share with others. The workshop will take place in the Hall.

Please return this slip to school by Thursday 9th February.

Yours sincerely,

Design & Technology Co-ordinator

Design & Technology Workshop
