Dear parents/carers,

In Year 1 this week the children have all had a go at the 99 club. The 99 club is a series of questions based on the 4 mathematical operations. Children have 5 minutes to work independently through a set of questions. All children start on the 11 club sheet, if children correctly answer all of the questions, the following week they move onto the next club number. We then keep the completed sheet which is stuck in their maths books as evidence. If children don’t correctly answer all of the questions, the sheet is sent home so that parents can see where their child has struggled and support them. Children remain on the same club sheet until they correctly answer all questions.

If you have any questions please speak to your child’s teacher.

Kind regards

Mrs McNickle Edwards
