5. Here are three digit cards.

\[
\begin{array}{ccc}
6 & 3 & 5 \\
\end{array}
\]

Place the digit cards in the number sentence.

\[
\begin{array}{ccc}
\square & \square & + & \square \\
\end{array}
\]

How many different totals can you find?
Which is the smallest total?

6. Here are three digit cards.

\[
\begin{array}{ccc}
1 & 2 & 8 \\
\end{array}
\]

Place the digit cards in the number sentence.

\[
\begin{array}{ccc}
\square & \square & + & \square \\
\end{array}
\]

How many different totals can you find?
Which is the smallest total?

7. Here are three digit cards.

\[
\begin{array}{ccc}
9 & 4 & 7 \\
\end{array}
\]

Place the digit cards in the number sentence.

\[
\begin{array}{ccc}
\square & \square & + & \square \\
\end{array}
\]

How many different totals can you find?
Which is the largest total?

8. Here are three digit cards.

\[
\begin{array}{ccc}
3 & 5 & 8 \\
\end{array}
\]

Place the digit cards in the number sentence.

\[
\begin{array}{ccc}
\square & \square & + & \square \\
\end{array}
\]

How many different totals can you find?
Which is the largest total?
