Aim of the challenge: To knock down the skittles as quickly as you can!

How to play: This weeks challenge is a target skills challenge involving knocking down skittles.
First you need to get 6 objects that can be your skittles. They need to be made of plastic, or something that won’t break, so plastic cups or plastic bottles would be ideal.
Set up your 6 skittles on the floor in a 1, 2, 3 formation like in the photo opposite. Each skittle needs to be about 10cm from other skittles. Set the skittles up just in front of a wall or door so the ball doesn’t run off!
Next take a couple of strides away from the skittles and this will be your shooting line. Put something down on the floor to mark where you shoot from. On the start of the stop watch roll your ball towards the skittles and try and knock them over. Then collect the ball and go back to your marker and shoot again to knock over any remaining skittles. Once they are all knocked over, stop the watch and see what your time is!
