Maths

Monday 6\textsuperscript{th} June

This week we will be recapping on subtraction and the different methods to use to help you.

There are two different one-minute subtraction challenges for you to try. Remember to try to enjoy the challenge of getting faster each day and don’t worry about getting them all answered!

To help your subtraction, please first practise counting back in 1s from 100. Use this song and actions to make it more fun!

https://www.youtube.com/watch?v=Ss-azuApvA0

Play this game with someone in your family.

There is also a subtraction game on the class page for you to do. If you like, you can change the numbers to suit your maths ability.
