**DO TRY THIS AT HOME**

**Issue #8**

**What you need:**
- a metal coat hanger
- two pieces of string
- a fork

**Featuring:**
Marvin and Milo

1. Watch me tune in to this coat hanger.
2. Tie a piece of string to each corner...
3. Put your fingers in your ears and I'll tap the hanger.
4. *dung*
5. Was it loud?
6. It sounds louder because the vibrations travel through the metal and string more easily than through air.
