Monday 4th May

This week we will be learning about telling the time.

Today we would like you to find all the clocks in your house, are they analogue clocks or digital clocks? Watch the video to see the two different types of clocks and learn a little about how to tell the time.
https://www.youtube.com/watch?v=UvcqVGEMGbY

Can you make your own clock? See the attached sheet and cut it out to use this week. If you do not have a split pin, you can use blue tac to stick your hands on in different places. You could also make a clock outside with a hula hoop, sticks and chalk, or be creative and make your own clock using completely natural objects. Send us a picture of your creations!
