Journeys Topic lesson 3

Creating a map

Today you are going to create a map. You can choose a map of your home, journey to school or any journey you know well. You may find it useful to do a rough plan or map first.

1. Look at maps in books and/or the internet. Google earth might be useful if you are doing a map of your journey to school.
2. Think about where your journey begins and draw a symbol or picture of it.
3. Now draw a symbol or picture of your destination in relation to your first picture.
4. Start at the beginning of your journey and think about what you see next, we call these landmarks, and draw a symbol or picture of it.
5. Keep going until you reach your destination.
6. Include a key to explain any symbols used.

There is an example photo of one attached below. I’m sure you can do better though!
