Maths

Wednesday 17th June

Last day of word problems!

This time you can work out your answers with or without the bar model. You may wish to draw your own sketches to find the answer.

However, you MUST write the full calculation you used to find the answer. It may be x, +, - or divide.

I have a couple of examples below. Take a look to help you out and then try the problems on the class page. There are quite a few questions so if you run out of steam that’s ok!

Challenge – write some of your own word problems for me and Mrs Tomes-Rolt to solve!
