Journeys Topic lesson 2
Observational drawings evaluation

It is important to look back at your work and evaluate. Look closely at your drawing and answer these questions.

What do you think went well with your drawing?
What was the bit you found easiest and why?
What was the bit you found trickiest and why?
What do you do differently next time?

Now ask someone in your family to give you feedback.

What do they think went well with your drawing?
What do they think you could do differently next time to improve your drawing?
