## How to Make a China Lapbook

1. Use an A3 piece of paper or card. Fold over each side of the paper so that the outer edges meet in the middle, like the diagram.

2. Glue the pouches included in the pack on the insides of the flaps so that the China flash cards, numbers 0-10 in Mandarin flash cards and anything else you wish can be stored in them.

3. Make an interesting front cover using the China cut outs, China colouring sheet or by drawing something yourself.

4. Use the rest of the resources however you like, just put inside your lapbook as you go along!
