Week 11 & Week 12 Geography:

Lesson 8 & 9

Learning Objectives: To create a collage of a river, adding the features, using geographical vocabulary.

You will be making a river in collage now that you know about where rivers come from. Look for the various materials you may have to make a collage. This may take a couple of sessions.

Activities:

1. Read the Journey of a River PowerPoint
2. Decide how big your collage will be – A4, A3 (you can attach pieces of paper together to make a larger size).
3. Create the background to your river.
4. Work on different features on different days, if need be.
5. When completed, make an illustrated glossary for the journey of a river.
6. Have a look at your completed collage. Can you point out a river feature (source, stream, tributary, confluence, waterfall, reservoir, dam, meander, estuary, mouth, sea)?
7. Add in the labels of the features.
