A new vision for partnership in Bristol: Survey for Public Consultation

In Bristol we have a number of different multi-agency Boards which are all dedicated to partnership working, but with different responsibilities:

- **The Bristol Safeguarding Adults Board** (BSAB) has oversight of the strategic safeguarding arrangements for adults with care and support needs that make them vulnerable to abuse and neglect.

- **Safer Bristol Partnership** (SBP) is the crime and disorder board that tackles crime, anti-social behaviour and substance misuse

- **The Bristol Safeguarding Children Board** (BSCB) has oversight of the strategic safeguarding arrangements for children

- **The Children and Families Partnership Board** (CFPB) commissions and delivers services that promote the health and wellbeing of children and families

The core partners which make up these Boards decided to look at all the arrangements and concluded that we could work together better by merging them all into a single partnership board.

We’ve now developed a proposal about what this might look like, but we want to hear from people across Bristol about what they think of our plans, where there might be problems, what we can improve, and what our priorities should be. We want to hear from everyone: professionals, members of the public, and particularly anyone who is or has been impacted by safeguarding or crime and disorder issues. This is an opportunity to have your say about what the new partnership should look like.

Please read more about our plans and complete the survey found at [http://bit.ly/SCSPTconsult](http://bit.ly/SCSPTconsult) by 10th May 2019, and share with anyone else who is interested in how we protect our population.
