A group of twelve people wants to hire boats for one hour.

How much more will they pay for the small boats than the big boats?
Ellie's book is open at a double page. The two page numbers add to 61.

What will the page numbers on the next double page add to?

How do you know that the page numbers on all double pages must add to an odd number?
The length of the monster's foot is **46.4 cm**.

What shoe size would he need?
