Your Hedgehog

I can plan a descriptive dialogue.

Look at your hedgehog model which you made in the last session.

You will be writing a dialogue starring your hedgehog but firstly you need to develop some character information about your hedgehog.

Think carefully about the questions on this activity sheet and fill in the answers.

What is your hedgehog called? ________________________________

How old is he/she? (In reality, hedgehogs are independent by 6 to 8 weeks old. Larger hedgehogs have a lifespan of 4-7 years although the dangers of the wild mean that many only live for 2 to 3 years.) ________________________________

How would you describe their appearance? ________________________________

What do they enjoy doing? ________________________________

What is their personality like? ________________________________

What are they often heard saying? ________________________________

Where do they live and who do they live with? ________________________________

Any other information about your hedgehog: ________________________________
