In Maths this week we have started to look at length and height. We have been exploring the different language we could use when talking about length and height, such as tall, taller, tallest, big, bigger, biggest, short, shorter, shortest, small, smaller, smallest, wider, narrower.

We drew around one of our feet and cut the footprint out. Then we took this and used it to measure different things and worked out whether they were bigger or smaller, taller or shorter than our footprint.

In RE this week we read a story about how Jesus told 2 brothers that God loves us all no matter what. The story spoke about how God loves all of the animals and all of the flowers (Luke 12: 24-30 and Matthew 6: 24-30).

We made a mind map of all of the things that we thought God took care of, then we went on a walk to see if we could find some of those things. When we got back to class we wrote a prayer thanking God for taking care of our world and of us.

In Literacy we have been exploring adjectives. Working together we looked at different pictures and created mind maps of the different adjectives we could use. We then presented our ideas back to the rest of the class.

Over the weekend see if you can get your child to try and use some adjectives when talking about the things that they see.

Star Of The Week

Daisy-Mai

for super measuring in Maths

Well done!

Just a quick reminder that your child’s water bottle should contain water, not squash or pop. I have seen some very strange shades of water over the last couple of weeks. Please can you make sure that the drink bottles only contain water. Thanks Mr. Wright 🍊
