We have started our work on ‘Alice in Wonderland’ this week. We have been reading the ‘Little Folks’ edition of Lewis Carroll’s novel which has been adapted especially for younger children. We have also been reading some of Carroll’s nonsense poems from the Alice stories including ‘Jabberwocky,’ ‘The Walrus & The Carpenter’ and ‘Old Father William.’

In Literacy the children have been looking at Wonderland and describing the different things that they would see there. We received a postcard from Alice telling us about what she had been doing there. Next week we will be writing our own postcards from Wonderland.

In Science this week we have been Nature Detectives and we have been discovering the changes that occur as the seasons change from summer to autumn. We went on a hunt around the field looking for different signs of autumn. Over the weekend your child may wish to collect leaves, twigs and conkers which they can bring into school to use for some autumnal art.

In Maths we have been exploring subtraction. We have spent a lot of time experimenting with taking actual things away from each other so that we can see what it means to take away, and how the number of objects becomes less when we have taken something away.

Over the weekend see if your child can experiment with taking away using objects from around the house such as their toys.

We hope that you like the snowman designs that we have created for this year Cauliflower Cards. If you want to order some of the items featuring your child’s design please can you return the order form (along with your child’s design) to school by next Wednesday at the latest (30th October).

**Star of the Week**

**William**

for a lovely piece of RE work on belonging.

Well done!
