Well we have completed our first full week in Year 1, and what a busy week it has been! We started our Science and History topics this week and the children have worked really hard on these. We hope that you have enjoyed following all of the things that we have been getting up to on our class dojo page.

Attached to this letter is our History knowledge organiser. I would like you to have a particular focus on this organiser with your child which is why I have sent this one home. Remember you can still access the other knowledge organisers for this half term on our class page on the school website.

In Literacy this week we have continued our work on Winnie the Pooh. The children have created a class story map of the story of ‘Winnie the Pooh and the Bees’ and they have been practising retelling the story using the story map and actions. See if they can tell the story to you over the weekend. Next week we shall be creating our own story maps of this story.

The children have also worked really hard with their spellings. When they bring next weeks spellings home they will also be bringing home a book that they can practise writing these spellings in.

In Maths we have continued learning to count to 100 with Spiderman and with DJ Count. We have also been thinking about 1 more and 1 less and finding out what is 1 more or 1 less than any number on our 100 square grid.

In Science our topic is ‘Animals including Humans.’ We have started the topic by looking at humans. We thought about our senses and then we drew a picture of ourselves and labelled the different parts of our body on the picture, including leg, head, hand, arm, face, knee, foot and neck.

We started our History topic this week which is all about toys. We looked at some different types of toys and thought about what they were made of. We then drew a picture of our favourite toy and wrote about it. Next week we shall have some visitors come and talk to us about the toys that they played with when they were younger, and we shall start to look at toys from the past.

Our first RE theme for this year is Domestic Church. For this theme we are thinking about our families. The children have been thinking about the big question ‘why do we have families?’ We have also drawn pictures of our own families and thought about how we show love and care in our families.
