| **Maths**    | Thank you for your patience with the provision of maths work while we continue to wait for Power Maths to release codes for access to the Summer Term books. Next week, White Rose, and the worksheets, are still free resources, so please make use of them. These are the lessons that your children will cover:  
**Monday:** Adding decimals with the same number of decimal places  
**Tuesday:** Subtracting decimals with the same number of decimal places  
**Wednesday:** Adding decimals with a different number of decimal places  
**Thursday:** Subtracting decimals with a different number of decimal places  
**Friday:** Maths Challenge! |
| **Reading**  | I heard that many of you enjoyed practicing the reading skill predicting what might happen from details stated and implied, so I thought you could look at some more strange pictures this week! On the Hexham Class school website page [https://www.stwilfridsangmering.co.uk/weekly-home-learning-activities-3/](https://www.stwilfridsangmering.co.uk/weekly-home-learning-activities-3/), you will find a document called Prediction Pictures 2. Here you will find another 5 pictures, with accompanying questions, one for each day of the week. |
| **Writing**  | Catch it! A group of meerkats lovingly tend to a beloved and unique fruit in the middle of the savannah. One day, their peaceful existence is disrupted by a vulture intent on stealing their pride and joy. Will the meerkats be able to get it back?  
To learn more, click here to watch the video: [https://www.youtube.com/watch?v=c88QE6yGhfM&safe=true](https://www.youtube.com/watch?v=c88QE6yGhfM&safe=true)  
Here are some suggestions for writing activities, day by day, but if you would like to add another genre that you feel confident with, please do!  
**Monday:** Tell the story from a meerkats point of view  
**Tuesday:** Create an internal monologue for the vulture (this would be the vulture’s thoughts)  
**Wednesday:** Describe the beautiful setting of the African plains  
**Thursday:** Create some dialogue (speech) between the meerkats at various points in the film  
**Friday:** Create some commentary for the ‘rugby scene at the end of the film – you can pretend to be a sports commentator and read it over the video at the end! |
| **RE**       | This week you can begin your new topic, number 7, Pentecost: Transformation. The Explore lesson (page 4) focuses on Transforming Energy. It’s quite interesting to think about renewable energies and how these can be better for our planet, particularly when Pope Francis keeps reminding us how important it is to look after the world God has made for us. Additionally this week, you can look at Learning Focus 1: On the road to Emmaus (page 7). You will find the lesson guidance for this on the Hexham Class Website page. Scroll through the document until you come to the Learning Focus. There are scripture references, key questions and suggest activities for each learning focus. [https://www.stwilfridsangmering.co.uk/re-topics/](https://www.stwilfridsangmering.co.uk/re-topics/) |
| **PE**       | Please sign up to the Specsavers ‘Virtual’ Sussex School Games 2020’ at [http://eepurl.com/gYEFSz](http://eepurl.com/gYEFSz). Each week a new sport, and it’s four challenges per sport, will be published at 9.30am every Monday morning, on [www.sussex school games.co.uk](http://www.sussex school games.co.uk)  
Results need to be uploaded by midday each Friday. |
| **Foundation Subject** | Geography:  
You will need to download the Extreme Earth Unit from Twinkl or you may already have it saved from the previous lessons. [https://www.twinkl.co.uk/resource/tp2-g-009-planit-geography-year-3-extreme-earth-unit-pack](https://www.twinkl.co.uk/resource/tp2-g-009-planit-geography-year-3-extreme-earth-unit-pack). As before, don’t worry that it says Year 3. This is suggested guidance as the National Curriculum for Geography can be taught at any point in KS2. At St Wilfrid’s we have set Volcanoes and Earthquakes as a Year 5 topic. This week you need to complete Lesson 6: Tornadoes. If you ask an adult to open the lesson plan first, this will tell you both what you need to prepare for the lesson. There will be a PowerPoint and follow-up activities. Make sure you recap all you have learnt in the topic – next week you will use it for some artwork! You might also be interested in Maddie and Greg’s Science video on Extreme Earth: [https://www.youtube.com/watch?v=C36aB6JEGms&safe=true](https://www.youtube.com/watch?v=C36aB6JEGms&safe=true) |

Please remember children should be reading daily. Please also check website links above with your children in case the content has changed since this document was written.
