Summerfield Primary School Newsletter

4K have set themselves targets for the year ahead which we know they can achieve! Starting with a positive attitude is so important in order to succeed.

It was a case of ‘Game On’ when 5M played hockey this week. They were learning about the skills of the game and working their way around various obstacles to ensure they had control of the ball. Not an easy skill to master but they did a great job!

4A have been reading scales this week on different objects. This will not only help them with their maths but also everyday activities like cooking.

5B have been researching the features of a newspaper report. They are planning to use what they have found to write their own. Great to see how hard they were working and how ready they are for the year ahead!

Year 6 have been getting scientific and making egg protectors to see if their eggs still break based on what protection is around it. I wonder how many eggs survived the fall?!

In Early Years, the children have been exploring in lots of different ways. It already looks like we have some artists in Reception! Nursery were having a wonderful time building sandcastles!
