Year 3 - Dates for your diary and a plea!

Science Experience Day

As we are sure you are aware, in Year 3 we have been working in partnership with characters from a ‘Galaxy far, far away’ unfortunately we are unable to visit the Galaxy so we have arranged for ‘Hands on Science’ to visit us instead.

On Tuesday 2nd April we will be taking part in a number of workshops where your children will be given the chance to continue their scientific journey and learn more by ‘doing’ science.

We are happy to tell you that there will be no charge for this experience and we hope that your child enjoys what they are about to discover.

Lightsaber morning

To help your children to complete their Jedi training they need to create their own Lightsaber. To make this more successful we are aiming to hold a Lightsaber making day, which we hope you will be able to attend with your child.

We invite you into school on Thursday 11th April from 9.30am where we would love for you to help your child build the ‘Lightsaber’ (torch) that they have designed. On the day, please wait at the front of school until one of us comes to collect you.

Resources

To enable great building can we ask you to send into school:

- clean and dry soft drinks bottles,
- kitchen/wrapping paper/Pringles etc tubes,
- toothpaste and other similar sized boxes,
- anything else that is Lightsaber shaped or you think will help with Lightsaber construction – e.g. clean foil, sweet wrapper cellophane etc

We need plenty of resources if each child is going to be able to complete their creation.

Thank you for your ongoing support.

The Year 3 Team.
