1. What are the basic components of an ecosystem
   - Define key ecosystem terms
   - List 3 components of an ecosystem
   - Explain how the components fit together in a small scale ecosystem

2. Distribution and characteristics of Global Biomes
   - Understand how changing one component in an ecosystem changes the balance.
   - Know the distribution of Global Biomes
   - Know key characteristics of Global Biomes

3. What are the Characteristics of a Tropical Rainforest (TRF)
   - Know the distribution of TRF
   - Know the climate Characteristics of TRF
   - Know the Soil characteristics of TRF

4. What are the causes of deforestation?
   - Understand the changing rates of deforestation
   - Know a range of causes of deforestation in Malaysia

5. What are the impacts of Deforestation?
   - Know the economic impacts of deforestation in Malaysia
   - Know the environmental impacts of deforestation in Malaysia

6. + 7 How to Manage the TRF
   - Understand the value of TRF
   - Know some strategies to manage rainforests sustainably
